# The Application

Over the past few years, due to changes in agriculture, many good barns and steel framed buildings have become redundant. Now enlightened owners and farmers are viewing these as a potential source of income and are tapping in to the rapidly expanding equestrian market.

Internal stabling, apart from its obvious advantages, are also usually the most cost effective option and if you move house, you can even dismantle the stables and take them with you!

There are many options to suit almost everyone's requirements but if you want something different we offer a bespoke design and manufacturing service using the latest technology and state of the art machinery.

We are able to offer high quality products at genuinely competitive prices.

# The Process

Stablesonline provides a consultancy, design and build service in the following stages:

- Initial phone consultation to understand the client's requirements
- Stableonline will then provide a detailed quotation based upon brief
- On acceptance of Quotation, Stableonline will, if necessary, send an engineer to the client's location to accurately measure and discuss the project
- Stableonline will then draw up a detailed plan for approval by the client
- Stableonline will then manufacturer the stables within an agreed timescale
- The stables will be delivered and installed if applicable at a time to suit the client

**Please contact us with your requirements by either emailing us at [info@stablesonline.co.uk](mailto:info@stablesonline.co.uk) or calling our freephone number 0800 756 9670**

## The Frames

We use only the very best quality steel box profiles with 40mm & 50mm square sections, skilfully welded for maximum safety, and supplied galvanised as standard to Iso 1461.

The upper half of the partitions/sides are fitted with square profile tubular grills with 100 mm gaps between the uprights (nip proof!) and on the upper fronts we offer full grills or quarter grills with 100mm gaps between verticals.

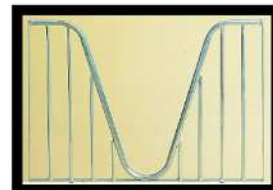

## The Doors

Our standard swinging doors are 4ft wide with a steel top rail to discourage crib biting. They are extremely robust and are fitted with high quality hardware including shoot bolts and kick bolts.

Our sliding doors use the best roller system available and offer a premium finish to any stable yard.

We can also fit anti-weave frames and top half doors as an optional extra.

# Standard Partition Options

Our standard partitions include the following variations:

Front Section with Full Grills

Front Section with Quarter Grills

Partition with full grills

Partition with full boarding

Our standard partitions come in 10', 12' and 14' sizes. We provide all the fittings required to install the stables including concrete bolts, self-taping metal screws and all the other hardware required.

Most of our clients choose to install the partitions themselves, but we do offer a nationwide installation service as well.

Call us free on **0800 756 9670**

# Infill Boarding Options

Stablesonline offers a variety of infill board to suit all preferences and budgets.

## Economy Range - Plywood

18mm Exterior Ply Board

## Mid-Range - Tongue and Groove Tanalised Stock boarding

34mm T&G Softwood

## Premium Range - Hardwood

34mm Untreated English Oak

## Premium Range - Recycled Heavy Duty Plastic

Available in a variety of colours  
34mm T&G Boading - Maintenance free

## Premium Range - Woven Bamboo

Our new bamboo infill option, not only looks amazing, but is stronger than all other materials.

It is maintenance free and can be disinfected easily.

## The Flat Pack Option

Stablesonline has developed a flat pack design that allows for easy shipping on a pallet. Each stable front or partition is made up of modular 4' and 2' sections.

Customers can order the relevant sections to make up the desired width.

The sections come with our full variety of infill boarding and are bolted together to create a strong and lasting stable.

The flat pack stables are easier to install and can easily be removed if you move house or require the space for another purpose at any time.

## Bespoke Design and Build

Stablesonline also provides a bespoke design and build service for customers wanting something a bit different!

Whether you have an old barn with unusual dimensions, need swinging partitions to hinge against the back wall or require a centre partition to slide into a variety of positions to create different size stables, then we are happy to help.

Please call or email us with your requirements and we will put together a quotation and design to suit your situation.

## Extras

Stablesonline can also provide a variety of extras including:

- Swivel Mangers
- Automatic Water Drinkers
- Hay Racks with External Access Hatches

# Installation Services

Most of our customers choose to install the stables themselves, but we also offer a nation wide installation service if required.

Our professional installers travel throughout the U.K. to erect our stables to a very high standard.

Customers are responsible for travel and accomodation expenses where applicable.

# Stable Products

We also provide a full variety of stable equipment including:
